### Care and maintenance

The same method of cleaning is valid for all Hardy freshwater reels.

1. Remove line and backing.
2. Remove the spool.
3. Flush away dirt by placing the spool and frame under a stream of warm water.
4. Dry carefully with a lint free cloth.
5. Lubricate with a good quality oil at the points illustrated on the diagrams.
6. Always ensure the spindle is adequately greased.
7. Always turn the drag to the minimum setting to avoid compression of drag washer or springs.
8. Always ensure the reel and line are dry before storing in the case or pouch.

### Changing your reel from left to right hand wind

All Lightweight reels are designed to work in right or left hand wind. When you receive your reel it will be set for left hand wind.

#### To convert your reel to right hand wind:

1. When changing a reel which possesses a lineguard, the lineguard must be removed (fig 1a) and refitted in the opposite position (fig 1b) before replacing the spool.

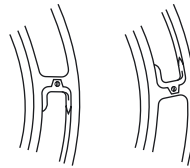

Fig.1a

Fig.1b

2. Remove spool by the latch bar located in the centre of the spool.
3. Turn both tongues (fig 2a) clockwise into position (fig 2b).
4. Replace spool.

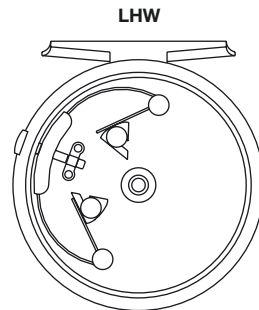

Fig.2a

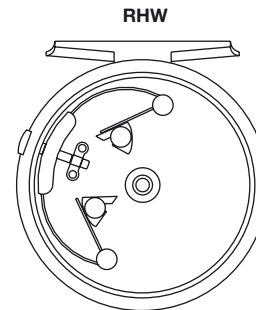

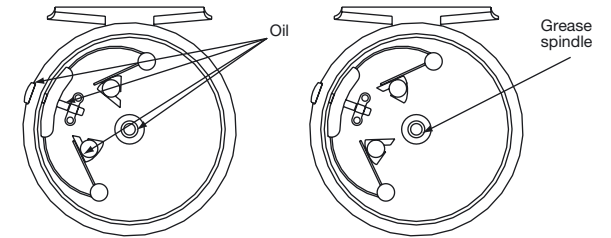

Fig.2b

### Compensating check mechanism

The check mechanism can be adjusted by simply turning the regulator screw on the side of the frame clockwise to increase the drag; anti-clockwise to decrease the drag.

### Lubrication Points

### Lifetime original user warranty

All Hardy Lightweight reels carry an original owner lifetime warranty against any defect in workmanship or materials. Should there be any defect, Hardy & Greys Ltd. will, at its option, repair or replace the item. This warranty does not cover damage caused by misuse, lack of maintenance, negligence or normal wear and tear. Warranty claims with the proof of purchase should be sent to:
